5 MAR 1920

To.

The Secretary to the Government of
H. H. the Maharajah of Mysore,
General and Revenue Secretariat,
Bangalore.

Dated the 2nd day of ~~February~~ March 1920

Sir,

Enclosed herewith we have the honour to forward on behalf of John Wells, an application under the Inventions and Designs Regulation, 1894, for leave to file a specification in respect of an invention for Improvements in Gas Producers.

The documents sent comprise :- a Power of Attorney in our favour and the Application with a description of the invention and Drawings.

A Patent for this invention in British India has been applied for, particulars of which are set out in the Application.

The fee of Rs 10/- payable on the application and one rupee for the stamp duty on the Power of Attorney, are included in the Money Order for Rs 77/- being sent by same mail.

We have the honour to be,

Sir,

Your most obedient servants,

H. V. Williams & Co.

(1)

APPLICATION

To.

The Dewan of Mysore,

THE APPLICATION of JOHN WELLS, of 36 Sharia Falaki, in the City of Cairo, Egypt, Consulting Engineer, for leave to file a Specification under Part 1 of the Inventions and Designs Regulation, 1894.

The applicant is in possession of an invention for "Improvements in Gas Producers", he is the inventor thereof; and to the best of his information and belief, the invention is new within the meaning of Part 1 of the Inventions and Designs Regulation, 1894; and no circumstance exists, which if the applicant be authorized to file a Specification and files it in accordance with that Part will disentitle him to an Exclusive Privilege thereunder in respect of the invention.

An application for a Patent was filed in British India, on 7th November 1919, No.5003, see Gazette of India, Part II, Page 1909, dated 15th November 1919, and was accepted on 1st December 1919, see Gazette of India, Part II, Page 2075, dated 6th December 1919.

The following is a description of the invention:-

5

This invention relates to gas producers.

According to this invention, the producer is made with an inner and an outer shell of iron plate or other suitable material, the space between these shells being adapted to receive water serving to cool the producer and also to cool the inlet-tubes or twyers whereby air is introduced into the body of the producer. These inlet-tubes or twyers are supplied with air through a manifold in any suitable manner, for example the air may be delivered into the manifold by means of an injector actuated by a pressure-jet from the exhaust of the engine.

An auxiliary fan may also be connected to the manifolds to supply air thereto before the injector is in operation i.e, in order to start the plant in operation means being also provided for closing off the fan-passages when the injector is in operation, and for closing off the injector-passages when the fan is in operation.

The air drawn in by the injector may be advantageously caused to pass over the surface of the water in the space between the inner and outer shells, so as to

carry with it the steam generated from such water by the heat of the producer. In this case, the outer shell may be provided with air-admission apertures at its upper part. Or the space between the inner and outer shells may be sealed so as to form a boiler the steam from which forms the pressure fluid for an injector whereby air is introduced into the manifold.

In the accompanying drawing:-

Fig.1. is a vertical central section of a gas producer constructed according to my invention.

Fig.2. is a side elevation of the same partly in vertical central section, and

Fig.3. a horizontal section on the line XX, Fig.1.

The body of the producer comprises an inner shell A and an outer shell B of iron plate. These shells are here shown of rectangular cross-section, they may however be of circular or other suitable cross-section. The corners of the inner shell A are rounded to prevent creeping upward of untransformed gases in the angles which would otherwise be present. The annular space between the shells A,B is adapted to receive water as indicated at C.

Through the lower part of this annular space there extend tubes D,D which open into the contracted lower part A' of the inner shell A and into which fit twyers E,E mounted on air-manifolds F,F. The tubes D,D being surrounded with water are not liable to damage from overheating.

Air is supplied to the manifolds F,F on one side through downtakes G,G,H controlled by a valve or damper J and supplied by an injector K, the pressure fluid for which is formed e.g. by exhaust gases from the engine, by steam from a steam boiler, or by compressed air from a tank or other source of supply. The air drawn in by the injector K enters the injector casing from the upper part of the annular space between the shells A,B through an aperture L in the outer casing B, into which it passes through apertures M,M so as to carry with it water-vapour from the upper surface of the heater-water C. If desired, the annular space between the shells A,B can be closed and the steam generated therein used as the pressure fluid for the injector K.

In order to start the gas-producer, the other ends

of the manifolds F,F are connected through downtakes G'G', and a damper J' to the delivery of a fan N which may be operated by hand through a crank O and suitable gearing.

When the fan N is in use, the downtake tube H of the injector is closed by the valve J, and when the injector K is in use, the downtakes tube H' of the fan N is closed by the valve J'.

The air necessary for the maintenance of fire conditions within the producer body may be maintained (1) by the suction of the engine drawing in air and vapour from the injector or from the fan, or (2) by air injected by the manipulation of the fan or (3) by the air and vapour injected by the injector operated under control from the exhaust pipe of the engine or by the exhaust pressure of the engine.

The bottom P of the producer body is fitted with a worm conveyor Q operated through a shaft R, driven mechanically or by hand. This ash discharge may if desired be arranged in a water seal or trap. The body of the producer is also fitted with a feed hopper S and with a gas outlet T. If desired, the feed hopper S may be provided with a conveyor similar to that Q used for removing the ashes.

Having now particularly described and ascertained the nature of my said invention, and in what manner the same is to be performed, I declare that what I claim is:-

1. A gas producer made with an inner and an outer shell, the space between these shells being adapted to receive water, for the purposes specified.

2. A constructional form of the gas-producer claimed in claim 1, wherein the air is admitted to the inner chamber through inlet-tubes or twyers extending through the water space.

3. A constructional form of the gas-producer claimed in claim 2, wherein the inlet-tubes or twyers are supplied with air through one or more common passages or manifolds.

4. A constructional form of the gas-producer claimed in claim 2, or in claim 3, wherein the inlet-tubes or twyers are supplied with air alternatively by means of a fan and an injector, substantially as described.

5. A constructional form of the gas-producer claimed in any of claims 1 to 4, wherein the air supplied to the inlet-tubes or twyers is mixed with steam from the

water in the space between the inner and outer shells.

6. A constructional form of the gas producer claimed in claim 5, wherein the air drawn in by the injector is caused to pass over the surface of the water in the space between the inner and outer shells, substantially as described.

7. A constructional form of the gas producer claimed in claim 5, wherein the space between the inner and outer shells is closed and the steam generated in such space is used, e.g. as the pressure-fluid for the injector supplying air to the inlet-tubes or twyers, substantially as described.

8. The combination, with the gas producer claimed in any of claims 1 to 7, of an ash pit, which is arranged below the producer, and is provided with a helical screw discharge for the ashes and with or without a water seal substantially as described.

9. The improved gas producer constructed substantially as hereinbefore described with reference to the accompanying drawing for the purposes specified.

B

The applicant therefore applies for leave to file a Specification of the invention pursuant to Part I of the Mysore Inventions and Designs Regulation, 1894.

Dated this 20th day of November 1919.

John Wells

I, JOHN WELLS, the applicant above named do declare that what is stated in this application is true to my knowledge, except as to matters stated on information and belief, and as to those matters I believe them to be true.

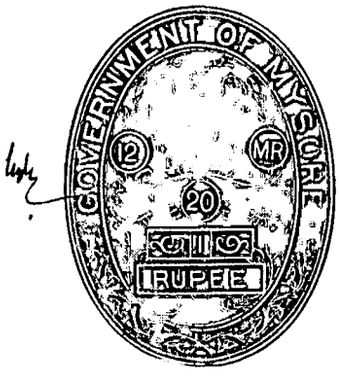
POWER OF ATTORNEY



IN THE MATTER of the Inventions and Designs Regulations, XI of 1894, of the Government of Mysore:

and

IN THE MATTER of JOHN WELLS, of 36 Sharia Falaki, in the City of Cairo, Egypt, Consulting Engineer, an Inventor,

I, the above named JOHN WELLS, do hereby retain constitute and appoint Messrs. H. V. Williams & Co., Patent Agents and Engineers, of 8 Esplanade East, Calcutta, British India, as my Agents and Attorneys to apply for and obtain from the Government of Mysore an Exclusive Privilege for "Improvements in Gas Producers" and to maintain the same in force; and I authorize them to sign my name to such papers and writings and do such acts regarding the same, including substitution and revocation, as may be necessary or expedient. And lastly, I request that all notices, requisitions and communications now or hereafter relating to the same may be sent to such Agents at the above address, and that they be recognized as my authorized Agents in all proceedings incident thereto.

Dated this 20th day of November 1919.

Signed, sealed and delivered by the above named JOHN WELLS, at London, in the presence of:-

GENERAL DEPARTMENT.

Register No. 27 **of 1919-20.**

Bangalore, the 6/4/1920

WHEREAS an application, dated the 2nd March 1920 and received on the 5th March 1920, has been submitted under Section 5 of the Mysore Inventions and Designs Regulation, 1894, by Messrs. H. V. Williams & Co., Calcutta on behalf of Mr. John Wells of 36, Sharia Zalaki, Cairo, Egypt, by occupation, Consulting Engineer (hereinafter referred to as "the applicant") for leave to file a specification of an invention for "Improvements in gas producers" (Case V)

And whereas the applicant has duly complied with all the requirements of Section 5 of the said Regulation;

The Government of Mysore are pleased, under Section 6 of the said Regulation, to authorize the applicant to file a specification of the said invention in accordance with the provisions of the said Regulation.

ORDERED, that the applicant be, and he is hereby, informed accordingly.

By Order of the Government of Mysore,

(Section 8 of the Inventions and Designs Regulation, 1894.)

8. (1) If within six months from the date of an order under Section 6, Sub-Section 1), or within such further time, not exceeding three months, as the Government of Mysore, in its discretion, may, on cause shown to its satisfaction and on payment of the fee prescribed in that behalf in the fourth schedule, see fit to allow, the applicant causes a specification of his invention to be filed in manner by this Part required, and the fee prescribed in the fourth schedule in respect of the filing of the specification to be paid, the applicant shall, subject to the other provisions of this Part, be entitled to the exclusive privilege of making, selling and using the invention in the Territories of Mysore, and of authorizing others so to do, for a term of fourteen years from the date of the filing of the specification.

(2) But an exclusive privilege in respect of an invention of a new manufacture shall, notwithstanding anything in Sub-Section (1), cease, if the inventor fails to pay, within the time limited in that behalf by the fourth schedule, any fee prescribed in that schedule in respect of the continuance of the privilege.

(3) If, nevertheless, in any case, by accident, mistake, or inadvertence, an inventor fails to pay any such fee within the time so limited, he may apply to the Government of Mysore for an enlargement of the time for making the payment.

(4) Thereupon the Government of Mysore may enlarge the time accordingly, on payment of the fee prescribed in that behalf in the fourth schedule, and subject to the following conditions, namely :—

(*a*) the time for making a payment shall not in any case be enlarged for more than three months ; and

(*b*) if any suit is instituted in respect of an infringement of the exclusive privilege committed after a failure to make a payment within the time limited for the making thereof and before the enlargement of that time, the Court disposing of the suit may, if it thinks fit, refuse to award or give any damages in respect of the infringement.
